

Smoke Generator For Trainings ASG Series

Technical data sheet

A various types of smoke generators are designed specially to produce realistic and dense smoke for intervention trainings. Robust design and simple control, makes it perfect for fast smoke filling inside the training area. Wireless remote control or wired panel makes it convenient for any training scenario. Arete smoke generator can be integrated to our training control "Logic" system or used separately.

Smoke Generator For Trainings ASG Series

Technical data sheet

Smoke generator is in conformity with the requirements according to the directives: 2014/35/EU (LVD) - Low Voltage Directive and is in conformity to the standards: LVS EN 60335-1-1 Standard Household and Similar Electrical Appliances.

Technical Characteristics

Model	ASG 2	ASG 3
Weight (kg empty)	5.2	6.5
Flow rate (m3/min)	800	1200
Heater power (W)	1700	3000
Start-up time (min)	3	3
Capacity of fluid tank (l)	2.0	3.5
Control type	Wired	Remote/Wired

Technical Data

Generator body:

Stainless steel and coated aluminium

Power supply:

220V/230V, 50Hz, single phase

Temperature range:

-25°C – 60°C

Heating element:

Permanent continuous system with overheating protection
